

## Tubing Safety Joints

Bull Dog's Tubing Safety Joints are designed with a coarse thread to provide a controlled backoff point in the workstring. Dual sets of o-rings provide sealing between the tubing I.D. and the annulus.

### Applications

Bull Dog's Tubing Safety Joints can be run in conjunction with the Bull Dog Bailer to provide a release point should the bottom-hole assembly become stuck.

### Features, Advantages and Benefits

- Tool diameters equivalent to tubing connections.
- Full opening I.D. for passage of wireline assemblies.
- Available with left or right-hand release.

### Specifications

Assembly No.	34-0306	34-0375
O.D.	3.06	3.75
I.D.	2.00	2.38
CONNECTION	2-3/8 EUE	2-7/8
TENSILE (lbs)*	153,700	230,830

*\*Tensile strengths listed do not include a factor of safety.*
