

## J-Tool Bushing Assembly

Bull Dog's J-Tool Bushing Assembly is used to mill over and retrieve, in one trip, packer or bridge plugs that cannot be recovered by conventional methods. The two-part assembly is designed for use with any type of fishing tool or engaging device.

### Applications

---

Milling over and retrieving packers or bridge plugs that cannot be recovered by conventional methods.

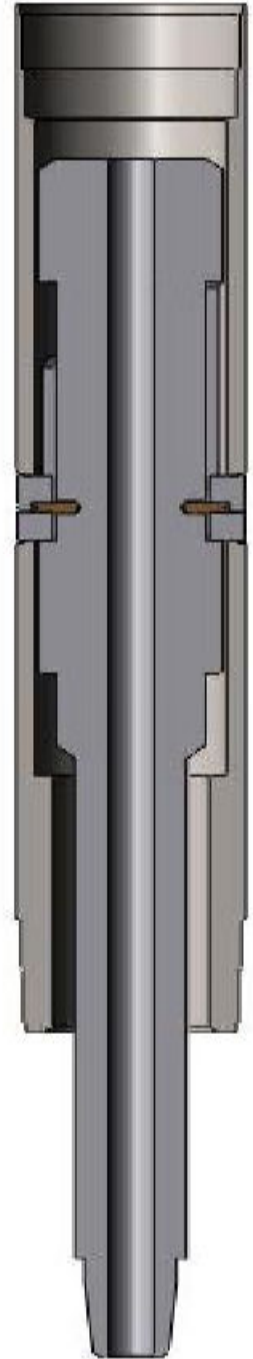

Milling over and recovering packers and tailpipe assemblies without mill-out extensions.

### Features, Advantages and Benefits

---

The Bull Dog J-Tool Bushing Assembly provides a time and cost saving alternative for retrieving packers and bridge plugs.

Versatile design enables use with a wide range of washpipe connections.
