

Junk Mills

Bull Dog offers a line of Junk Mill bodies which can be furnished blank or dressed with crushed carbide.

Large circulation ports and watercourses improve circulation and debris removal for both conventional and reverse circulation.

Applications

Milling almost anything in the wellbore, including, but not limited to: bit cones, cement, packers, bridge plugs, squeeze tools, perforating guns, drillpipe, tool joints, etc.

Features, Advantages and Benefits

- Built with oversized water courses for reverse circulation.
- Available blank to be dressed by customer.
- Experienced in-house carbide personnel for dressing to customer's specifications.
