

PlugMuncher Mills

The Bull Dog PlugMuncher Mill offers an economical option for drill outs when combined with the Bull Dog HBR (Hydraulic Bit Release). Dressed with crushed carbide by experienced oilfield welders, PlugMunchers have been used to drill out cement, composite plugs, sand, and other debris.

Applications

The Bull Dog PlugMuncher Mill can be used in applications where an economical mill is required that can be disposed of at the end of the job.

Features, Advantages and Benefits

- Large ports and water courses for reverse or conventional circulation.
- Experienced in-house carbide personnel for dressing to customer's specifications.
